Description

Organic manure in 1 cm diameter pellets. Métal box 8 kilograms.

For use especially on outdoor bonsai. N-P-K: 5.4.1. The most popular fertiliser product used by Japanese gardening professionals.

How to use: put the pellets on the earth at the beginning of spring, summer and autumn.

Dosage: for a 20 cm pot use 3 to 4 grains every 45 days. This dose can be adjusted depending on how fast you want your plants and trees to grow.
