

Juniperus chinensis itoigawa ref 1907199

Juniperus chinensis itoigawa

ref. 10187

[\[+\] Show on the website](#)

Description

Height of the tree without its pot: 230 mm. Width of the branches: 300 mm.

Artisanal non-enamelled collection fired pot: 150*170*65 mm with a pattern on the front side.

Moyogi style.

Juniper with graceful trays, a shari on its trunk and jins.

Trunk diameter of about 40/50 mm and nebari of about 90 mm.

Itoigawa variety with green canopy scales, particularly vigorous and perfectly adapted to the bonsai.

Unlike the classic juniperus chinensis, this bonsai only loses little foliage in the beginning of summer.

This subject is more than 40 years old, that is why it has a formed bark.

Not any strong wire wound nor cutting wound.

Remarkable subject!

Authentic bonsai with natural jin and shari do not mistake with tanukis.
