### Description

Its polyethylene tank can hold 0.5 litre and will be easy to use for your chemical or organic treatments.

Height : 240 mm. Height of the only tank : 180 mm. Diameter of the tank : 85 mm. The adjustable nozzle enables you to adjust the width of the jet and the flow for a thin jet or a mist. The tank has an adapted graduation for chemical or organic products. An ergonomic trigger is assembled on it with the yellow stop that lays on your hand. Thanks to its large and flat bottom it is very steady.
