

Jita japanese wood display stand

› Bonsai tables and jita

ref. 10725

[\[+\] Show on the website](#)

Description

Thickness: 3/6 mm.

Measurements: 22*19 cm. For excellent presentation, show flowering and fruiting bonsai (cotoneaster, rhododendron, plum, quince or cherry) on this solid wooden board that spills out beneath the pot. Made in Japan, this jita is superior quality, showing the deep, rich shades of the natural wood. Each specialist bonsai shelf is made by slicing off a diseased part of a tree, it's then varnished to highlight all the knots and the edges are sculpted by hand. Buy this tablet to enhance kusamono, mini bonsai or figurines and create a wonderful display at home.
