Description

Height of the only tree : 360 mm.

Width of the branches : 450 mm.

Dimensions of the old enamelled pot : 320*215*70 mm.

5-trunk kabudachi style, formed from layering with ramified trays. The bark is formed because this bonsai is more than 25 years old.

Superb bonsai from Kawahara nursery in Kawasaki. Golden yellow flowers in April, deciduous green foliage in summer and then red orange to golden yellow in fall.

This tree was repotted in March 2021 in pure akadama soil. This type of bonsai requires a wintering protected from strong frost. It is rare, even in Japan, to see berberis bonsai but it has many attractive traits : its yellow hanging flowers, its little round leaves and its beautiful fall colors. It will make the happiness of a bonsai lover.

Not any strong wire or cutting wound.

Shelf not included. Photographed without leaves in April 2021 and with leaves in May 2021.
