Acer palmatum deshojo

ref. 10970

[\[+\] Show on the website](#)

Description

Height of the only tree : 280 mm. Width : 240 mm.

Dimensions of the enamelled pot : 180*55 mm.

Moyogi style, young formed trays.

This bonsai comes from aerial layering.

No strong grafting, cutting or wire marks. Promising bonsai with which you can form a quality nebari because aerial layering usually favors a graceful roots set. Red vermillion foliage in spring that turns to green in summer and yellow/orange in fall. Shelf not included.
