Description

Height of the only tree : 740 mm. Width of the branches : 700 mm. Quality pot from Yixing : 570*460*80 mm. Moyogi style. This is an unique piece that comes from seedlings and has a wonderful formed bark. The maples with such an elegance are rare, that one has a beautiful nebari measuring about 270 mm of width, ramified and formed trays, a good conicity of the trunk and a harmonious ramification. Moreover, this tree has a nice green foliage that turns to bright red in Fall. There is not very strong wire marks. There is a cutting wound on the trunk that is healing, you can see it on the pictures, it will be totally healed in the end of 2021. Diameter of the trunk at the base : about 60-70 mm. This bonsai has a rough trunk and a slender shape, that is why it will be perfect in the collection of a bonsai lover. It comes from one of the most famous Japanese bonsai nursery of Fukaya : Hashimoto. Repoted in 2020 Winter in pure akadama soil.
