Description

Height of the only tree: 750 mm. Width of the branches: about 780 mm. Japanese quality pot from Yokaichi of: 580*430*62 mm. Two-trunk sokan style. Unique piece that comes from seedlings. Very beautiful and perfectly formed bark. The maples with such an elegance are rare, that one has a wonderful nebari with a width of about 280-290 mm, formed and ramified trays. The trunk of this bonsaï has a regular conicity. This tree has a harmonious ramification that brings a beautiful little green foliage that turns to bright red in Fall. No strong cutting wounds or wire marks. A little bump was removed on the trunk with a grafting blade in March 2021 and will be healed in 2021 Fall. Diameter of the trunk at its base: about 90/110 mm.

With its rough trunk and its slender shape, this tree will be perfect in the collection of true bonsaï lover. It comes from one of the most famous Japanese nurseries: Master Kentaro Shiino's nursery. Repoted in akadama soil during 2021 Spring.

For collectors. Shelf not included. Photographed in June 2021.
