

## Rhododendron 270502125

*Satsuki asuka no homare*

ref. 11029 

[\[+\] Show on the website](#)

### Description

Height of the only tree : 620 mm. Width of the branches : 600 mm.

Blue enamelled pot of : 370\*290\*80 mm. Nebari of about 100 mm.

Diameter of the trunk : about 25 mm. Formed and ramified trays. Asuka no homare variety

with pink flower, white in the middle. No strong cutting wounds or wire marks. Being rare, this variety have always had success in Japan because its flowers are not too big. Easy to cultivate, requires to be in full sunlight and a good fertilization after flowering as well as a severe cutting. Coming from Kobayashi's nursery in Kanuma. Photographed in April 2021 and photographed with flowers in June 2021. Shelf not included.

[See our complete book on azaleas.](#)

A superb satsuki with much grace and elegance, a graceful movement of the trunk and beautiful ramified trays.
