Description

Height of the tree : 640 mm. Width : 680 mm. Enamelled pot of : 480*390*70 mm.

Moyogi style. This tree is more than 40 years old and is coming from seedlings. It has formed trays and a beautiful bark. It will take two to three years more to refine the ramifications of the trays, with successive cuts in order to get a thinner ramification. Diameter of the trunk : about 60-70 mm. Nebari : about 220 mm. Requires to be in full sunlight during Spring and partial shade during Summer. The trunk has a good conicity and no strong cutting wounds or wire marks. This tree has an amazing roots base.

It is coming from Master Murakawa's nursery. Repoted in akadama soil in March 2021.

Shelf not included. Photographed during Spring, in May 2021.
