

## Hosta bright star

*Hosta bright star*

ref. 11039

[\[+\] Show on the website](#)

### Description

Coming from a hybridization of Hosta Dark star.

Similar to Hosta Sleeping star.

Height : about 30/40 cm.

Width : about 40/60 cm.

Dimensions of the leaves : about 23x10 cm.

Spear-shaped leaves, green in the middle like a paintbrush drawing and bright yellow on the outside part of the limb. The sides turn to creamy white in the middle of the summer.

Blue/purple flowers during summer.

Variety resistant to slugs.

**Big rhizome delivered in a 1 liter plastic pot.**
