Description

Height of the tree only: 220 mm. Width: 250 mm.

Dimensions of the enameled artisanal pot :170*50 mm. Moyogi style.

This bonsaï comes from seedlings and there are no wire marks, grafting marks, or very strong cutting wounds.

Copper-colored spring foliage that turns to green during summer and bright orange-toned yellow in autumn.

The barks desquamates and lets appear a superb trunk. Pinky white flowering in spring and then yellow fruits at the end of summer.

Conicity of the trunk, ramifications, beauty, formed bark and the flexibility of the trunk's movement are special characteristics that make that bonsaï a quality subject.

Diameter of the trunk: about 20/25 mm.

Photographed in October 2021. That piece comes from Master Takahashi's nursery.

Shelf not included.

Cut in September 2019 under the direction of Master Tomoya Nishikawa and repoted this autumn in a bonsaï pot.
