Description

Organic fertilizer with progressive release : +- 6 mois.

4 kilos bucket. Used for years on our maples at the nursery. Composition: N-P-K : 7-3-11 +2MgO + 7CaO. You may put it on the soil at the beginning of spring and autumn. Successfully used by professionnals. Dosage for a 20 cm pot : 10/15 grains every 60 days. If your plant is in the ground, you may form little piles, 2 to 6 handfuls per square meter depending on the results you want to get. This dose can be increased, depending on the growth fast you want. +- 4 mm diameter grains. Usually used outside. Enriched with azote (N) it favors the growth and the development of the plant. The phosphorus (P) reinforces the natural resistance of the plants, favors the roots system growth and carries the energy in the plant. Enriched in potash (K), which is essential for a good flowering, for the growth of the fruits and the reserve organs. The potash improves the color of the flowers and the fruits but also the resistance to illnesses. The magnesium (Mg) is essential for the photosynthesis. The calcium (Ca) improves the fruits and grains maturity. These trace elements are essentials to the health of the plants. Organic product that ferments, releases an odor and may attract insects. This fertilizer is conform to NF U 44-551 norm and can be used in organic agriculture in conformity with CE 834/2007 regulation.
