Description

Leaves: brownish red with brownish green shades in spring, turning to dark green in summer, and red and then yellow in autumn. Originally, this variety showed variegation, as set out especially in the famous work by Mr Vertrees, but since then, no one has been able to obtain the variegations again.

Technical description

Species	Acer amoenum
Variety	Yubae
Leaf colour	Purple leaves
Leaf shape	Palmated
Adult height	Between 2 and 4 meters
Shape	Natural
Exposure	Sun
