

## Eugenia myrtifolia 301200213

*Eugenia uniflora*

ref. 11471

[\[+\] Show on the website](#)

### Description

Height of the tree only: 680 mm. Width of the branches: 600 mm. Moyogi style.

It comes from seedlings that are more than 20 years old.

Dimensions of the non-enameled pot: 430\*350\*125 mm.

Diameter of the trunk: about 70 mm. Nebari: about 140 mm.

Shiny dark green foliage with copper-colored new shoots and the flowers are little white balls. Also called Cayenne cherry, it will then give red ribbed edible fruits.

The bark has the particularity that it desquamates like plane trees, which lets appear a beautiful orange/beige tone.

This variety will live perfectly outside, in the Midi french region otherwise it may be protected from frost in the colder regions.

It also can be placed in a conservatory during the wintering period.
