

Pinus pentaphylla 18020225

Pinus pentaphylla

ref. 11586 

[\[+\] Show on the website](#)

Description

Height of the tree: 550 mm. Width : 600 mm. Non-enameled pot, brown-colored: 410*310*110 mm. Sharimiki moyogi style with a hollowed trunk. Diameter of the trunk: 160 mm. Nebari: 260 mm.

This bonsai is more than 50 years old and comes from seedlings with small natural needles.

Formed trays and beautiful bark at the base of the trunk. Very good conicity of the trunk. Absolutely requires full sun exposure. Not any wound. Beautiful roots base.

You may ligature it to lower the main branches and give that beautiful tree more character.

Photographed in February 2022. Shelf not included.

The hollowed trunk with the shari is entirely natural, do not mistake it with the bonsai that are formed with a chisel, a chainsaw...
