Description

Leaves: pinky green in spring, dark green in summer, and reddish-orange in autumn.

Shiny orange-yellow wood with shades of red in winter on the branches of the last 2 years. Rapid growth.

This variety bears wood in winter of a brighter hue than the sango kaki variety.

The impact of cold on this variety is spectacular with the onset of winter: the wood turns red but when the temperatures are lower the wood turns yellow.

A one-of-a-kind and very original variety that will bring color to your flowerbeds in winter.

Technical description

Species	Acer palmatum
Variety	Dixie delight
Leaf colour	Green leaves
