### Description

Resulting from the hybridization of the species sieboldianum and a seedling of palmatum this hybrid brings a very strong resistance to cold. Originally from the famous Iseli nursery in the USA in Oregon.

Orange foliage when the buds burst, turning dark green in summer, then orange-red, scarlet red in autumn.

Large sheet cut into strips more than 8-10 cm wide.

Apart from its spectacular foliage in autumn coloring, ice dragon is vigorous, it will find its place alone on a lawn or in beds.

Its tabular port gives it an original character. Relatively fast-growing, the annual growth usually reaches 30 cm. Variety protected under license multiplication prohibited. ®

### Technical description

<i>Species</i>	Japanese Maples
<i>Variety</i>	Acer x pseudosieboldianum ice dragon
<i>Leaf colour</i>	Green leaves
<i>Leaf shape</i>	Dissectum
<i>Adult height</i>	Less than 2 meters
<i>Shape</i>	Tabular
<i>Exposure</i>	Sun
