Description

Height of the tree only: 400 mm. Width of the branches: about 290 mm. Dimensions of the quality enameled pot: 265*180*35. It was repotted in this pot in 2022. Chokan style with a vertical trunk and superb roots. This bonsai comes from Ishiguro nurseries, Kawasaki, Japan. It's already more than 20 years old, has a beautifully formed bark and its trunk has good conicity. Diameter of the trunk: about 25-30 mm. Remarkable nebari: about 90-130 mm. The many ramifications, their harmonious position, and the soft curve of the trunk are the main characteristics of this tree that turn it into an exceptional subject for collectors. No strong wire or cutting wound. Photographed in March and September 2022 with and without foliage. The shelf is not included.
