## Description

Height of the tree only: 660 mm. Width of the branches: 530 mm.

Dimensions of the quality firmed pot: 430\*330\*50 mm. Moyogi style. A unique piece that comes from seedlings, and has a beautifully formed bark. The maples with such an elegance are rare and this one has a very beautiful nebari of about 170\*180 mm wide. It has formed and ramified trays, a regular conicity of the trunk, and a harmonious ramification. The foliage is green and turns bright red during autumn. No strong wire mark or cutting wound. Diameter of the trunk at the base: about 50-60 mm. It will be ideal in the collection of a true bonsaï's lover with its beautiful twisted trunk. It comes from one of the most famous bonsaï nurseries in Japan: Master Chiaru's nursery, in Suiko-en, Shizuoka ken. Visit his nursery here.
