

Pinus pentaphylla glauca

Pinus pentaphylla

ref. 11872 

18,00€

[\[+\] Show on the website](#)

Description

Tree produced by grafting.

Size 35/40 cm.

Sold in a 3 litres pot.

A dwarf variety, pinus pentaphylla 'glauca' is an ideal species for creating small to mid-sized bonsai. The needles are very small, appearing green in the spring and blue all summer, resulting in the most beautiful effect. We recommend cleaning it annually, getting rid of any dead needles on the branches.

Likes sun/mid-shade and fertilising with Biogold once a month until the end of October.
