Description

Very toothed foliage on the edge of the limb, salmon pink green with visible veins in spring, pale green in summer then scarlet red in autumn. Note that its superb spring coloring will last from budburst until the end of June. One of the most beautiful varieties of the last 15 years. Unique in its kind for its vigor and robustness, requires partial shade. Obtained USA from Talon Buchholz Oregon. One of my favorites due to its vigour, its dazzling color will delight all gardeners. New introduction in Europe Guy MAILLOT.

Technical description

<i>Species</i>	Acer matsumurae
<i>Variety</i>	Jubilee
<i>Leaf colour</i>	Veined
<i>Leaf shape</i>	Palmated
<i>Adult height</i>	Between 2 and 4 meters
<i>Shape</i>	Natural
<i>Exposure</i>	Partial shade
