Description

Height of the only tree : 490 mm, with a branch spread of approximately 480 mm.

The pottery, a quality piece from Yixing, is stamped and measures 455*340*55 mm.

This was repoted in this pot in March 2022.

Moyogi style with impressive roots.

Its massive trunk measures about 115 mm in diameter.

Additionally, it distinguishes itself with an exceptional nebari of 300-320 mm.

Coming from the Ishiguro nurseries in Kawasaki, this is a splendid specimen of over 40 years old.

Its well-formed bark adds to its charm, as does the elegant conicity of its trunk.

The branches have been carefully structured and branched, without major cutting wounds or visible ligature marks.

A new back branch is currently in the process of forming.

Please note that the display stand is not included.

Photographs of this tree were taken in August 2023.
