

Juniperus rigida 07011237

Juniperus rigida

ref. 12062

[\[+\] Show on the website](#)

Description

Height of the tree alone: 650 mm.

Branch width**: 530 mm.

Quality artisanal unglazed pottery: Ø 340*80 mm.

Moyogi style.

Very beautiful bonsai with its perfectly formed bark from yamadori without any strong cutting wounds or strong wire marks.

This bonsai was cut in autumn 2023, it will need time to branch out to densify its trays. With good fertilization, a semi-shaded exposure next summer, and regular watering, it will be superb in a year.

Selected by Guy Maillot for the beauty of its jin and shari, this tree is over 70/80 years old.

Beautiful movement of the trunk, splendid shari and jin. Sold without the display stand. Photographed in November 2023.
