Description

Tree height: 740 mm. Width: 630 mm.

Dimensions of the unglazed pottery: 510*400*140 mm.

Moyogi style.

This bonsai has been cultivated from seed, devoid of any wire marks, grafting, or significant pruning wounds.

Its foliage undergoes a captivating transformation, with coppery hues in spring, transitioning to a lush green in summer, and culminating in a vivid orange-yellow display in autumn.

The bark gracefully peels away, unveiling a superb trunk.

In spring, the tree adorns itself with pinkish-white blossoms, followed by the emergence of yellow fruit in late summer.

The impeccable conicity of the trunk, well-defined branching, the aesthetic appeal and regularity of the nebari, the artfully formed bark, and the fluid movement of the trunk collectively elevate this bonsai to the status of a distinguished specimen.

The trunk boasts a diameter of approximately 80-100 mm, while the nebari spans an impressive width of approximately 180-200 mm. Photographed in November 2023, this piece originates from Me Takahashi's esteemed nursery and is available for purchase without its stand.
