

Acer palmatum 'deshojo'

Japanese maple

ref. 1210

[\[+\] Show on the website](#)

Description

Description: Palmate maple grown from cutting.
Delivered in a plastic pot.
Ø of the crown 3/5 mm.
Plant branched out 25-30 cm.

The main attraction of the acer palmatum 'Deshojo' is its ultra bright red foliage in spring. The leaves turn purplish green in summer and red-orange in autumn. This variety is suitable for bonsai.
