Description

oothed foliage on the edge of the lamina, salmon pink with visible veins in spring, pale green in summer then bright orange in autumn.

One of the most beautiful varieties of the last 15 years. Unique in its kind for its vigor and robustness, supports full sun. Obtained USA from Talon Buchholz Oregon. One of my favorites due to its vigour, its dazzling color will delight all gardeners.

"In response to the growing demand in Europe for collectible varieties, this year I'm offering high-quality plants at more affordable prices. These young plants, ranging in height from 10 to 20 centimeters, are perfect for enhancing your collection from the very beginning of their development.

Please note: they must remain in their original pots until spring 2027."
