Description

Leaves: pinkish orange in spring, green in summer and dark reddish orange in autumn.

In response to the growing demand in Europe for collectible varieties, I am offering younger, high-quality plants this year. These plants, measuring between 10 and 20 centimeters in height, are perfect for enriching your collection right from the start of their development. Please note that they must remain in their original pots until spring 2026. Fertilizer has already been added to the substrate, providing sufficient nutrients for the entire year of 2026. Keep a close eye on watering and shelter it from the wind; a spot in partial shade will suit it best.

Technical description

Species	<i>Acer palmatum</i>
Variety	Akebono
Leaf colour	Pink leaves
Leaf shape	Palmated
Adult height	Between 2 and 4 meters
Shape	Natural
Exposure	Sun
