Description

Foliage is pinkish-yellow-green in spring, dark green in summer, and orange-red in autumn. In winter, the wood turns red on the branches from the past two years.

'Cupid' is a dwarf mutation discovered by Mr. Maple on a coral bark Japanese maple, shown in the photo. Grafting this dense mutation produced a dwarf coral bark Japanese maple that will reach 6 to 8 feet (1.8 to 2.4 meters) in 15 years. Its fall color is a bright yellow.

Technical description

<i>Species</i>	Acer palmatum
<i>Variety</i>	Cupid
<i>Leaf colour</i>	Green leaves
<i>Leaf shape</i>	Palmated
<i>Adult height</i>	Less than 2 meters
<i>Shape</i>	Natural
<i>Exposure</i>	Sun
