Description

Exceptional Centuries-Old Bonsai - Juniperus Itoigawa (Over 120 - 14 Years Old)

Height of the Tree (without pot): 760 mm

Branch Width: 480 mm Pottery: Handmade Chinese Yixing unglazed pot, signed, dimensions: 370 x 300 x 160 mm Bonsai Features: Species: Juniperus Itoigawa, known for its fine, green scales and exceptional vigor.

This variety is ideal for bonsai cultivation, with minimal leaf drop in early summer, unlike Juniperus Chinensis. Style: Neagari (aerial roots) with elegant roots and a twisted trunk. The tree exhibits a natural shari on its roots and jins (dead branches), creating a very ancient and authentic aesthetic.

Estimated Age: Over 120 years, which is reflected in the texture and formation of its bark. A true "old master" in the bonsai world. Origin: From the renowned nursery of Master Kenji Oshima, known for his exceptional specimens.

This bonsai is a rare and truly unique subject, with an original jin and shari, not to be confused with a "tanuki." Care: Reformed in September 2022 by Master Tomoya using copper wire, it is currently without wire, with no significant pruning marks or damage. The tree has never been harmed by wire or aggressive pruning, preserving its natural beauty. The tree has been carefully maintained to preserve its authenticity. Note: The tablet is not included in the sale. Important Information: This bonsai stands out not only for its impressive size and venerable age but also for its ability to embody the perfect balance between nature and craftsmanship. A true living work of art. Do you have the complete book on Juniperus? It could be an excellent resource to deepen your knowledge of this fascinating species.
