Description

Highly mature bonsai, intended for enthusiasts and collectors.

Tree height alone: 700 mm. Branch spread: 780 mm. Presented in an unglazed brick-colored pot, measuring 520 × 430 × 115 mm. Sankan-style bonsai with three trunks, offering a powerful and well-balanced composition. Trunk base diameters: approximately 25 mm, 40 mm, and 90 mm. Well-developed nebari, approximately 280 mm. A specimen over 70 years old, featuring excellent trunk taper, harmonious movement, and well-formed bark. The ramification is dense and well structured, with no major pruning scars or old wire marks. The presence of jins adds character and maturity to the overall composition. The tree is currently wired to lower certain branches and further enhance its character and silhouette. Origin: Japanese nursery of Master Kentaro Shiino. Restyled and pruned by the Master in 2023. Photographed in December 2025. Display stand not included.
