Description

Descended from a 2/3 year-old seedling.

Delivered in a plastic 0.8 litre pot.

Height 20-30 cm.

Stewartia monadelphica is an outstanding tree for year-round interest. At the beginning of summer white cupped flowers bloom, while in winter the leaves drop to reveal a red-orange bark. In spring pink foliage emerges, in summer it turns green and in autumn it is red-orange. The tree prefers cool soils in summer and a mid-shade position. This beautiful species is often used in bonsai.
