## Description

Quality cast aluminium rotating turntable, Ø 300 mm, manufactured in Japan. This is used to orientate your indoor or outdoor bonsai towards the light. The position of the tree, and whether it’s facing towards or away from the sunshine, affects its harmonious growth. In Japan bonsai are turned slightly once a month. This turntable facilitates rotating heavy topics. Practically everlasting and rustproof. Rotation by ball-bearing. Weight supported: 50/60 kilograms. Indispensable for the owners of large pieces.
