Description

Japanese Handcrafted Garden Claw - Ergonomic Wooden Handle

Dimensions: Total length: 200 mm Length of the claw: approximately 60 mm Length of the handle: 125 mm Features: Handcrafted in Japan, this garden claw combines quality, durability, and traditional craftsmanship. The claw is securely fitted into the handle to ensure a stable grip and maximum longevity. Designed for comfortable use with its ergonomic handle, it helps reduce fatigue during extended tasks. Ideal for root disentangling, this claw is the strongest in its category, suitable for demanding gardens. Benefits: Exceptional strength: The design of this claw provides enhanced resistance, allowing it to handle even the toughest roots. User comfort: Its ergonomic handle ensures a firm, slip-free grip, even during intensive use. Japanese quality: Handcrafted construction ensures a refined finish and extended durability.
