Description

Diameter outside 37.5 cm. Interior diameter: 34 cm. Outside / interior height: 17.5/15.5 cm. To turn a tree into a bonsai you'll need this nursery pot, which is made in Japan and designed especially for this purpose. Featuring an enamelled flange and a large hole for drainage, this low training pot aids aeration and the development of surface nébari roots. For example, take a maple or a tree from nature and let the young sapling grow in this frost-resistant, fine earth pot. When it's ready you can repot it into an elegant bonsai pot.
