

## Kanuma volcanic soil for azalea satsuki 2 bags

› Bonsai soil and fertiliser › Bonsai soil

ref. 5266

[\[+\] Show on the website](#)

### Description

**This yellow-orange colour volcanic earth is brilliant for cultivating azaleas and rhododendrons. Maples also love it because it makes the soil more acidic.**

Here at Maillot-Bonsai nursery we specialise in growing Japanese maple varieties and we add 10 to 15 percent Kanuma earth to their normal soil to ensure great results. This natural dry earth is found in meadows close to Kanuma city.

Kanuma medium grain earth, 2 sachets +- 16 litres, total +- 32 litres. Weight (according to the rate of humidity) 5.55 kilograms.

**Origin:** SUPERIOR QUALITY earth from Japan.

**How to use:** Use on its own or add gravel or large-grain sand but not compost.
