Description

Large grain bonsai soil used for making drainage beds.

Small bag +- 2 litres. Weight +- 1.5 kilos bag. Grain size 3/5 mm. SUPERIOR QUALITY, DRIED FOR MORE THAN 2 YEARS. Weight according to the rate of moisture of 1.5 kilograms.

Origin: natural volcanic earth from the mountainous regions of Japan.

Benefits: soil drainage and root ventilation for the healthy growth of your bonsai.

How to use: use alone or add gravel and large-grained sand but not compost. This earth is not very nourishing and a Biogold fertiliser should be used regularly. You'll need to water this large-grained soil more in summer.

Species: for cultivating all coniferous and deciduous species (except rhododendrons and azaleas, for which you'll need Kanuma earth).

Please kindly note that this is a heavy product to send and we charge extra for postage.
