Description

Size: 40/45 cm long and 40 cm wide. Weight :+/-18/25 kilos. Unit price.
Imported from Japan,

For comfortable walking, we recommend using at least 3 stepping stones per linear meter. Adjust spacing depending on the curves of the path. To ensure a pleasant walking experience, avoid placing them too far apart.

Our garden elements (basins, granite lanterns, stones, and stepping stones) are generally stored outdoors. This allows them to naturally develop a patina and aged appearance (with lichens and moss), adding a unique touch of authenticity that is highly appreciated in traditional Japanese garden design. A shipping surcharge has been applied due to the high number of small orders containing only 3 to 5 stones. These orders require pallet shipping via a freight carrier. For orders of more than 15 stones, a more cost-effective, personalized delivery quote can be provided upon request. Thank you for your understanding.
