Description

Brown spring foliage then beginning May he/it becomes multicolored of orange, green rose, cream on some leaves. In been plume of green clear, red in fall.Exceptional coloration indeed the variegation is always new of part the position of the colors on the leaf. We counsel you in order to keep the most beautiful variegations to fold back the non multicolored branches that are developed themselves.

As far as possible one will privilege the variegation rather than the height of the topic.

For a lasting variegation he/it is indispensable to supervise the growth of non multicolored shoots and to suppress them.

The delivered plant will have branched out little.
