

## Copper wire cutter 110 mm

› Bonsai tools › Training tools › Pruning scissors

ref. 6609

[\[+\] Show on the website](#)

### Description

Made of rustproof steel, these cutters are used to cut copper or thin aluminium wire binding the branches. They permit precise work and are more comfortable to hold than pincers. The screw adjusts the tightness of the blades. Japanese quality. Length 110 mm, including the 20 mm blade. For 2.5 mm diameter aluminium wire and 1.5 mm annealed copper wire.
