

## Hosta fire island

*Giboshi fire island*

ref. 6794

[\[+\] Show on the website](#)

### Description

Hosta 'Fire Island' gets its name from the deep maroon-red stalks and superb bright yellow large leaves. The yellow hue becomes green at the end of summer. Lavender flowers at the beginning of July.

Leaves 12 cm long x 8 cm wide.

Height: 35 cm x 60 cm wide.

Derived from crossing a *longipes hypoglauca* and 'Crested Surf', 1999.

**Big rhizome delivered in a 1.5 litre plastic container.**

**You can use also as kusamono / accent plant for bonsai display.**
