### Description

Japanese Garden Lantern in Genuine Granite, approximately 80 cm in height, 60 cm in diameter, and weighing 90 kg, composed of 5 separate pieces. This model is drilled through the center and can be fitted with a small light. It also features a wooden window.

Our garden elements (basins, granite lanterns, stones, and stepping stones) are generally stored outdoors. This allows them to naturally develop a patina and aged appearance (with lichens and moss), which adds an extra layer of authenticity that is highly valued in the art of traditional Japanese gardening.
