

Pyracantha angustifolia bonsai ref: 300901511

Pyracantha angustifolia

ref. 9271

[\[+\] Show on the website](#)

Description

Height of the tree only: 23 cm.

Length of the bough: 20 cm.

Non-enamelled riveted pot: Ø 18*4.7 cm.

Sold without presentation shelf.

For a burst of autumn colour in the garden, choose this firethorn bonsai (*pyracantha angustifolia*). White flowers in spring give way to clumps of red-orange berries that last all through fall. This 10-year-old tree was grown from a cutting and has been trained in moyogi style. The species is easy to care for and fast growing, making it the ideal bonsai for an amateur collector.
